

PUZZLE HIGH

product family _____
table

meeting unit with monitor hanger

meeting unit

"Puzzle High; allows the organization of areas for meeting and sharing ideas that bring interaction to the forefront by changing the monotonous working conditions of the users. It promotes collaboration and productivity. It offers a holistic solution to the new generation working needs with its accessories which enable the integration of units such as TV, storage units and with the dimensions and module varieties. It is an ideal option for individual work as well as teamwork and meetings. It creates the feeling of a separate space by isolating the meeting environment from the open office space in terms of sound and image."

DIFFERENT FEELING
OF SPACE

Puzzle High brings interaction to the fore by changing the usual working conditions; It creates separate spaces in open office environments where employees can hold fast and dynamic meetings and exchange ideas. With accessory additions, it can be used as a meeting table for spontaneous and informal meetings, or it can be configured as a work desk suitable for individual use. While the felt-covered acoustic panel in the upper section provides sound insulation, the side perforated panel allows efficient meetings thanks to the screen integrated on it. Puzzle High, which allows communication at eye level by standing or sitting, provides mobility in the office as it encourages standing.
