# BUG

adapts to different  
office environments...

**Fatih Aslantaş**

“Thanks to its structure that balances out the warmth of an environment, solid wood that plays an important role in creating comfortable interior spaces is coming together with other construction material, and present a harmonious image together. This is felt as contentment by users to a certain extent. Thanks to simultaneously exhibited togetherness and independence, Bug acquires a design that is capable of providing functional solutions to various office environments.”

Bug has a wide product family with solid wood foot structure that is unusual and independent from each other, and choices of tables with various sizes, and it creates a sincere atmosphere in environments with its organic contours.
