FOCUS

Özge Çağla Aktaş
Utkan Kızıltuğ

“Noise may cause physical and psychological damage to human health. As the noise level increases, the stress level rises, focusing problem occurs. When it is exposed for a long time, blood pressure increases and many problems such as breathing problems occurs. Therefore noise is seen as a frequent problem in many offices, causes concentration problems and thus to decrease employee’s productivity. With Focus, it is aimed to create peaceful workspaces that are visually and aurally isolated in open office environments. With its modular structure, many different usage scenarios can be created such as for spontaneous meetings, a comfortable, quiet resting area, isolated work areas ... Magazine holder, white board and hanger accessories satisfy overall user / employee needs.”

Focus Shelf, besides being space divider and sound absorbing features, it can be used as an independent storage and display unit.

Focus Meet, creates semi-closed spaces in open office environments where employees can hold fast and dynamic meetings and exchange their ideas.

Focus Flex; increases concentration and employee productivity by preventing sound reflections in the office.
