

HEXA

simple geometry and modular
flexibility timeless a product.

Fatih Aslantaş

"We can see that the waiting group furniture used in the waiting and common areas of the institutions is also used in common shared open work areas such as open office today. When designing Hexa we wanted to create a product range that meets the needs of a wide range of applications and multi-user appeal. Thanks to the modular structure, many different spaces can be placed in different combinations. It's a product that can respond to the needs of the user and the environment, Hexa. "

Hexagonal and diagonal lean geometric forms can be used alone, as they form endless variations coming together.

As the seating units are not assembled to each other, the user can change the sitting order whenever he wishes.

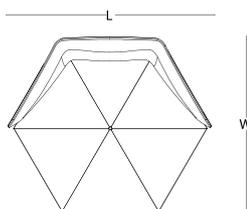

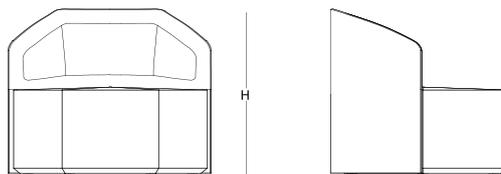

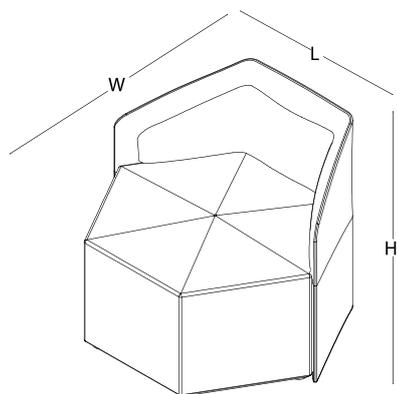

While the hexagonal module that can be used with or without backrest offers its user a much more comfortable seating, the diagonal modules come together and fulfill the multi seating need. In the hexagonal module with backrest, the seating depth is more than the standard seating measurements.
