# OPERA

## b•design team

Offices can be seen as a stage where different individuals come together, much like the rhythm and harmony of a company. Each employee takes the stage like an opera performer, showcasing their unique talents, and together, they present a magical performance through collaboration and performance. Starting from this idea, we designed the "Opera" product family, inspired by the elegance of art, reflecting the complexity and dynamism of the business world.

Opera is specifically designed for operational employees. Single, double, triple, quadruple, quintuple, and sextuple workstation options allow each player to play a unique role on the stage, enabling employees to seamlessly participate in business processes. Single executive desks represent areas where leaders, like lead actors on stage, guide business strategies.

The grand and impressive stage design, essential to every opera, takes center stage in the Opera product family. The design, which combines aesthetics and function, enhances productivity for employees while adding elegance to the environment.

Opera workstation brings together the complexity of the business world and the beauty of collaboration. As each employee takes the stage to showcase their talents, the company's big picture comes to life through a magical performance created by collaboration and harmony. Therefore, every office can become an opera stage, and every employee can become an opera performer. Opera workstation is poised to become a symbol of a workplace that transforms this magical thought into reality.

## Operational

Designed to create dynamic and efficient workspaces, the Opera product family transforms the office environment into the stage for successful teams. With its modular structure and product variety, Opera provides freedom of choice, allowing for unlimited combinations to be created based on needs and facilitating the reshaping of your workspace to optimize workflow. Single desks support users in creating individual and unique workspaces, while workstations that can be expanded from double to sextuple facilitate the creation of shared workspaces where larger teams collaborate more easily.

Storage modules positioned on either side or both sides of the desk strike a perfect balance between functionality and elegance. Tall cabinets, positionable separately from the desk, serve both as storage and separators in the utilized space. Colored panels placed on the short and long sides of the desk provide a quieter and more peaceful environment while adding a touch of uniqueness and vibrancy to the workspace.

The cable channel and electrification solutions, developed in conjunction with Opera, featuring an open structure from the bottom in both directions, put an end to cable clutter, creating organized workspaces. Outlets that can be integrated into the top of the desks or storage units allow for the easy use and charging of electronic devices, contributing to a more efficient use of active areas.

## Managerial

The Opera executive desk, designed to meet the business requirements of managers and support team spirit, creates a functional and holistic look within the office. Outlets that can be integrated into the top of the desks or storage units allow for the easy use and charging of electronic devices, enabling a more efficient use of active areas.

## Meeting

Meeting units integrated alongside Opera workstations encourage effective collaboration and creative thinking among employees, facilitating the emergence of new ideas and solutions.

Opera meeting tables come in various forms such as triangle, circular, square, and rectangular, offering numerous options suitable for the number of participants and the environment they will be used in. With color choices and electrification solutions, Opera meeting tables contribute to the success of collaborative work.
